

# What to do in Power Line Incidents

If your vehicle has been involved in an accident with an electrical pole or transformer (green box):

## Be cautious

Assume the vehicle and anything touching it is energized

## Do not move or exit

Stay inside until help arrives unless there is a fire

## In case of fire...

Jump free with both feet together

**⚠ Never contact the ground and your vehicle at the same time**

If someone receives an electrical shock:

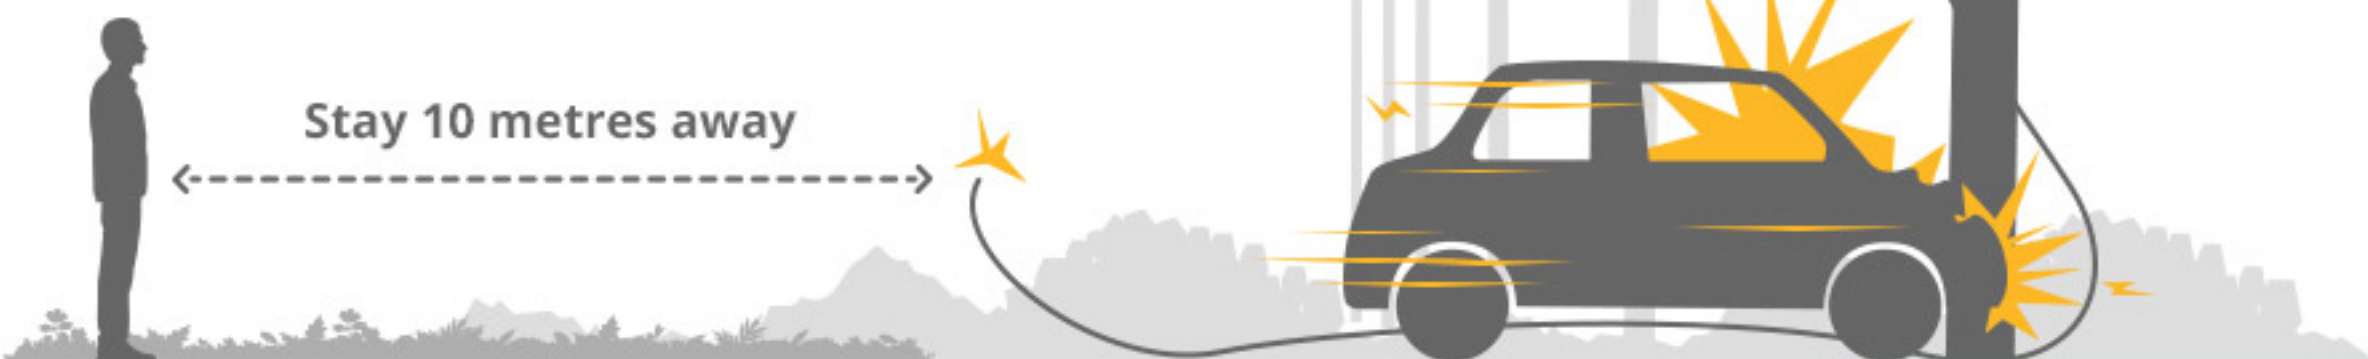

## Do not touch them

If he or she is still in contact with electricity, they could shock you too

## Have someone call an ambulance

But make sure you or someone else stays with the victim

Stay at least

# 10

metres away

Report an electrical emergency:

# 310-WIRE (9473)

1-866-717-3113
